

● PROFILE · WEB APPLICATION DEVELOPMENT

Frontend. Built with care. And personality.

I'm Wolfgang, a frontend developer focused on Vue, Nuxt and TypeScript. I build web applications and enjoy working on solutions that make a tangible difference in everyday use.

DEVELOPER. TEAM PLAYER. FAMILY MAN.

01 / ABOUT ME

Good development starts with understanding.

I completed vocational training as an IT specialist for application development and have more than five years of professional experience in web development. My focus is on Vue.js, Nuxt, TypeScript and responsive, component-based interfaces.

Most recently, I worked at Etzensperger Informatik AG on client projects and the continued development of edoobox. Before that, I developed web apps, PWAs, mobile applications and administrative interfaces at LeanERA.

I take the time to understand existing applications and value clear code, testing and straightforward coordination. Benefit and effort should remain in a sensible balance.

02 / SKILLS

My toolkit.

A clear focus.
And the right tools around it.
